About us.....

International Impact Building Products, LLC (IIBP) is a manufacturer of custom sliding glass doors known as PLAZA DOORS. These doors have been continually tested, modified and improved since their beginning in 1960. Made from the finest extruded, architectural grade aluminum, our designs are customized to meet the highest performance require-ments of Impact or Non-impact doors.

Located in West Palm Beach for over 50 years, the Plaza Doors have been installed in every state in the US, the Caribbean, and parts of the Pacific.

We take our reputation seriously and vow to make sure you have consistent quality and service beyond expectations with prices among the most competitive.

Our high standards surpass the stringent testing required for acceptance by Miami-Dade NOA– Texas Department of Insurance, ASTM, and others.

We look forward to answering any questions you have and to finding the "Custom" door design you need for your home or business.

CUSTOM SLIDING DOORS

SINCE 1960

Quality doesn't cost..... It Pays!

Why Plaza Doors?

-REPUTATION— in business for over 50 years, widely recognized among architects, contractors, designers and professionals in the building and remodeling industry.

-DURABILITY— only the finest aluminum, all stainless steel deadlocks and hardware, the smoothest, quietest roller assemblies and the best screens in the industry.

-DESIGN— we have a door that was designed for the Customer—wider site lines, ease of handling, and each one is CUSTOMIZED to your specifications. We offer doors up to 10' in height. Call us or your local glass /glazing company for more info on how we can fit your sliding door needs.

The Breakers Hotel– Palm Beach FL

Products

We have 3 different lines of sliding doors

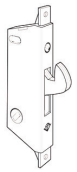
Sentry **Atlas** **Titans**

Our doors are impact and non-impact. We have NOA 's from Miami-Dade and Texas Department of Insurance certification.. Please go to our web site to have each of these lines further described, or call us to have a dealer put in touch with you.

Features of Plaza Doors

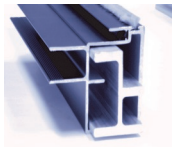
Deadbolt Security Lock

The lever operated extension flush bolt provides positive, dependable security. For the added security of a keyed system, the MS 1850 deadbolt answers the security needs for commercial or residential. The massive laminated bolt is provided in a hook shape to resist the parting motion of the sliding door and jamb.



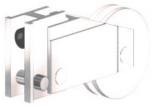
Interlocks

The stiffeners in our interlocks are of the heaviest grade of aluminum to provide the best support without the worry of rust.

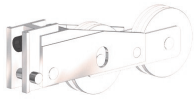


Roller Assembly

One of the most important components of a sliding glass door is the roller assembly. We designed our own. Made of 6061-T6 Grade aluminum alloy with stainless steel axle pins, ball bearings, and adjusting screw, the large diameter wheel is molded of a high density DELRIN compound for durability. Delrin is a naturally lubricating material that does not wear away the heavy anodized finish applied to the track. It all adds up to a very quiet, easy rolling, corrosion resistant door.



The Tandem Roller Assembly is included for our heavy duty titan Series units.



4 Point Weather Sealing-Double pile & Bulb Vinyl

The pile "fuzz" weather stripping plays the critical role of keeping insects from finding their way inside. The bulb vinyl weather stripping blocks wind and rain water from entering the interior. IIBP integrates this industry standard of weather sealing twice at every jamb, door astragal, and interlock meeting condition. This helps eliminate the "whistling" or "howling" many sliding glass doors produce during extremely windy conditions.

Options

Custom Colors

We offer 4 standard finishes:
Bronze & Clear Anodized or
White & Sandtone painted
but we offer you your choice of custom colors as well as the unique "Wood Grain" look, — a revolutionary new coating process that gives the appearance of a high-end look simulating wood grains.

Handles-

We offer custom handles available through our catalogs.

The 90° Door

In 1991 special configurations were developed by Plaza Door allowing for a "traveling corner" now called a 90° or 45° door.

Doors in Motion

Plaza doors are designed to accept Doors in Motions systems, an automation solution that allows homeowners to safely and quietly operate larger doors with the touch of a button.
